

"Information technology (IT) should be a competitive advantage—not a disadvantage or challenge. IT should enable businesses to grow and prosper and not be a reason for failure. Think about it."

*-Brian L. DiMambro, President
Norvada Technologies*

At Norvada Technologies . . .

We believe, IT has evolved:

- × overly complex
- × overly expensive
- × more prone to failure

We strive to present solutions to businesses of all sizes that help to:

- ★ simplify their critical infrastructure
- ★ increase reliability
- ★ reduce costs

We understand that IT is a critical component of a successful and thriving business. At the same time, it can also be its weakest link. Business operations can be quickly disabled by complex and expensive IT challenges. Downtime affects production and income is lost until repairs or replacements are completed.

We help our clients reduce costs and complexity in the following key areas:

- ✓ Nuvola™ (Cloud) services
- ✓ Backup services -- fault-tolerant and secure remote
- ✓ Compliance services -- foster regulatory compliance*

* HIPAA/HITECH, Gramm-Leach-Bliley Act (GLBA), Nevada SB227/SB347, Fair and Accurate Credit Transactions Act (FACTA) and FACTA Red Flags Rule, and Fair Credit Reporting Act (FCRA). Check with your attorney to see how these laws may specifically apply to you.

CLOUD-HOSTED SOLUTIONS

- Full QuickBooks Pro/Premier
 - 2009
 - 2010
 - 2011
- Databases
 - SQL Server

Simplify your company's dependence on IT

Protect your most critical data!
Cloud-enabled IT solutions that work!

CLOUD SOLUTIONS

- CLOUD ASSESSMENT
- CLOUD HOSTING
- CO-LOCATION
- SECURE REMOTE BACKUPS
- REGULATORY COMPLIANCE

NUVOLA SERVICES

Nuvola services provided by **NorVada Technologies** are cloud-based application hosting and data protection services.

NorVada cloud computing specialists work with you to identify the applications and data that are suitable for being cloud hosted.

Would a secure access from your desktop, smartphone, pad or laptop computer benefit your business?

If the data your business depended on was safe, virtually immune from disasters, and always available, would this be of value to you?

Think about it . . .

. . . flexible solutions for
your business needs.

CLOUD COMPUTING

By means of hosted Internet-based services, commonly known as **cloud services**, cloud computing enables you to access your data and programs that are stored in a secure Internet environment. **Access is private and safe.**

Some cloud services host very low sensitive customer information, while others represent mission critical business functions. The key is having cloud-based protection against external threats to your programs and data combined with secure access to working with and managing your data.

The biggest difference between cloud computing and having these applications and data on your laptop or desktop is that they will not get lost, destroyed, or stolen.

Foremost, **NorVada Technologies** provides guidance within the context of the business mission, risks, rewards, and cloud threat environment—using sound risk management practices.

Once in the cloud, your programs and data can be securely accessed wherever you are . . .

- ★ conveniently
 - ★ simply
 - ★ safely
 - ★ securely!

Just as if they were on your laptop or desktop!

We promise you . . .

✓ CLOUD ASSESSMENT

To identify your information technology needs prior to suggesting any products or solutions.

✓ CLOUD HOSTING

To match the right solution for your business that fits your business needs.

✓ CO-LOCATION

To provide secure managed rack space for your capitalized IT infrastructure in a professionally managed data center.

✓ SECURE DATA BACKUPS

To protect your data with secure cloud-based backup solutions that **virtually disaster-proofs** all your critical data.

✓ REGULATORY COMPLIANCE

To help you identify compliance issues and provide both process and technology solutions that can mitigate your risk for security breaches and identity theft and help with your business compliance before negligence becomes a problem.

We work with a diverse customer base. How can we help you?

We provide a consistent level of service excellence by listening to our clients and delivering the services that help their businesses thrive.
